Update 51 of TCEQ Air Section Activities - 3/31/2019 1400 through 2200 Hours

All,

Attached are handheld monitoring field data sheets of the air monitoring conducted by TCEQ investigators from March 31, 2019 at 1400 hours to 2200 hours.

A TCEQ Team and SWS Contractor were dispatched to the intersection of East X Street and Luella Lane at approximately 2013. At approximately 2100, a very light to moderate sweet gasoline odor was detected by the TCEQ Team for 15 minutes of a 15-minute odor survey at 1202 N Kaufman Drive. No air monitoring readings above the action levels identified by unified command were detected during the air monitoring survey. At approximately 2130, a strong gasoline odor was detected for 15 minutes of a 15-minute odor survey at 1300 E Thirteenth Street. Additionally, VOC readings of 0.3 ppm – 1.2 ppm were detected at that time.

The Air Section will provide the next update on April 1, 2019 at approximately 0700 hours with information from handheld monitoring field data sheets of the air monitoring conducted by SWS contractors from March 31, 2019 at 1800 hours to April 1, 2019 0600 hours.
